

Which OR PTC DCI option is right for me?

Follow the path below to find which OR PTC DCI option is right for you!

The **OR PTC DCI Mobile App** is a free application and the most popular choice for Providers!

- Easily clock in, clock out, and view hours using a smart phone/device.
- Available for Apple and Android
- Takes up very little space on your device
- Has an offline mode for when Internet is not available during the shift

The **OR PTC DCI Landline** option is perfect if there is a landline phone in the home where services are provided and no smart phone/device access.

- Automated phone system for clocking in/out.
- No Internet connection required.
- Consumers only need to sign off on historical time entries.

The **OR PTC DCI Fob** is another way to capture time when a smart phone/device or landline is unavailable.

- A small fixed device where the Consumer receives services.
- Produces unique codes at the start and end of the shift, which the Provider tracks on a paper time card.
- Providers must be able to access the internet at least once per pay period to enter time into the **OR PTC DCI Web Portal**.
