

Purpose: Explains the OR PTC DCI EVV Options and will help you pick the option that aligns with your level of comfort with technology.

Outcome: Users know how to choose an EVV method based on their comfort level with technology.

Comfort Level with Technology

Comfortable

Kind of Comfortable

Not Comfortable

What is it?

OR PTC DCI Mobile App

Free mobile application used on an Android or iOS smart device.

OR PTC DCI Fob

Small device kept securely in the consumer's home where services are provided.

OR PTC DCI Landline

Uses the landline phone in the consumer's home where services are provided.

What do I need to do?

Provider: Uses the app to clock-in and clock-out at the start and end of each shift.

Consumer: Not required to use the app. Can sign off on the provider's shift by entering a PIN/password or e-signature, if desired.

Provider: Records fob codes daily. Enters fob codes into the OR PTC DCI Web Portal by the end of the pay period.

Consumer: No action is required from consumers.

Provider: Uses the consumer's landline to call an 844 number at start and end of each shift.

Consumer: Only requires action from consumer to enter PIN using the phone for historical entries.

Note: If editing entries, you will need to use the OR PTC DCI Web Portal (which can be accessed via a computer, laptop, or web browser of a smart device).

Note: If the consumer does not own a landline, consider the fob as an option if you are not comfortable with technology.
