

April 2020 Release Notes

Don't feel dampened by April showers, the latest DCI update will brighten your day This release puts the brakes on client transportation stalling in the mobile app. We also performed some additional maintenance while the car was in the shop.

Most of the maintenance took place under the hood, so you won't see the difference. Here are a couple of features that you will see:

- The intermittent issue of being unable to end Client Transportation has been resolved
- Users can now create a new billing batch for Employer Reimbursement Payroll by selecting the "Select From Payroll Batches" function
- The "Remove" button has been removed from the Billing Punch Entries page
- The "Holds" column now displays on the Authorization Run Rate report
- Please note that we will have some scheduled downtime to perform this maintenance.

The system will be unavailable to all users during the following time:

- April 27th from 2 am to 4 am EST (2 hours)
