

January 2021 Release Notes

During the holiday season, those of us at DCI were hard at work making improvements and performing system maintenance. As a result, we have a maintenance release that will require a mobile app update.

In addition to the maintenance, we are introducing new functionality for those who use our payroll module. Negative Dollars Batch Validation has been expanded to include additional account types. You can learn more by clicking the release notes below.

[Import Formats for Service Providers](#)

Please note that we now support the following operating systems:

- Android OS 8 and above
- iOS 13 and above

Click the button below for our supported devices.

Please note that we will have some scheduled downtime to perform this maintenance. The system will be unavailable to all users during the following time:

- January 11th, 10 PM to January 12th, at 12 AM PDT (2 hours)

This release will include a new version of the mobile app for both iOS and Android. This release will require an update to your mobile app.
