Caregiver Ratings - Admin

Description: In this topic, the user will learn how to enable caregiver rating emails on client profiles and view caregiver ratings. If the caregiver rating setting is enabled, all clients who receive hourly services can rate the service received for every punch entry, however, it is not a requirement. If caregiver rating emails are enabled, the client will receive an email after each punch inviting them to rate the service received. If not enabled, they will still be able to rate their service in the system. Caregiver rating is available in all DCI modalities.

*Please note: Caregiver ratings are an instance-level setting. Please submit a help desk ticket (Zendesk) to request the setting be enabled for the organization.

Role Required: Super User

Permission Required: N/A
