

# Mobile App - Client - E-Signature

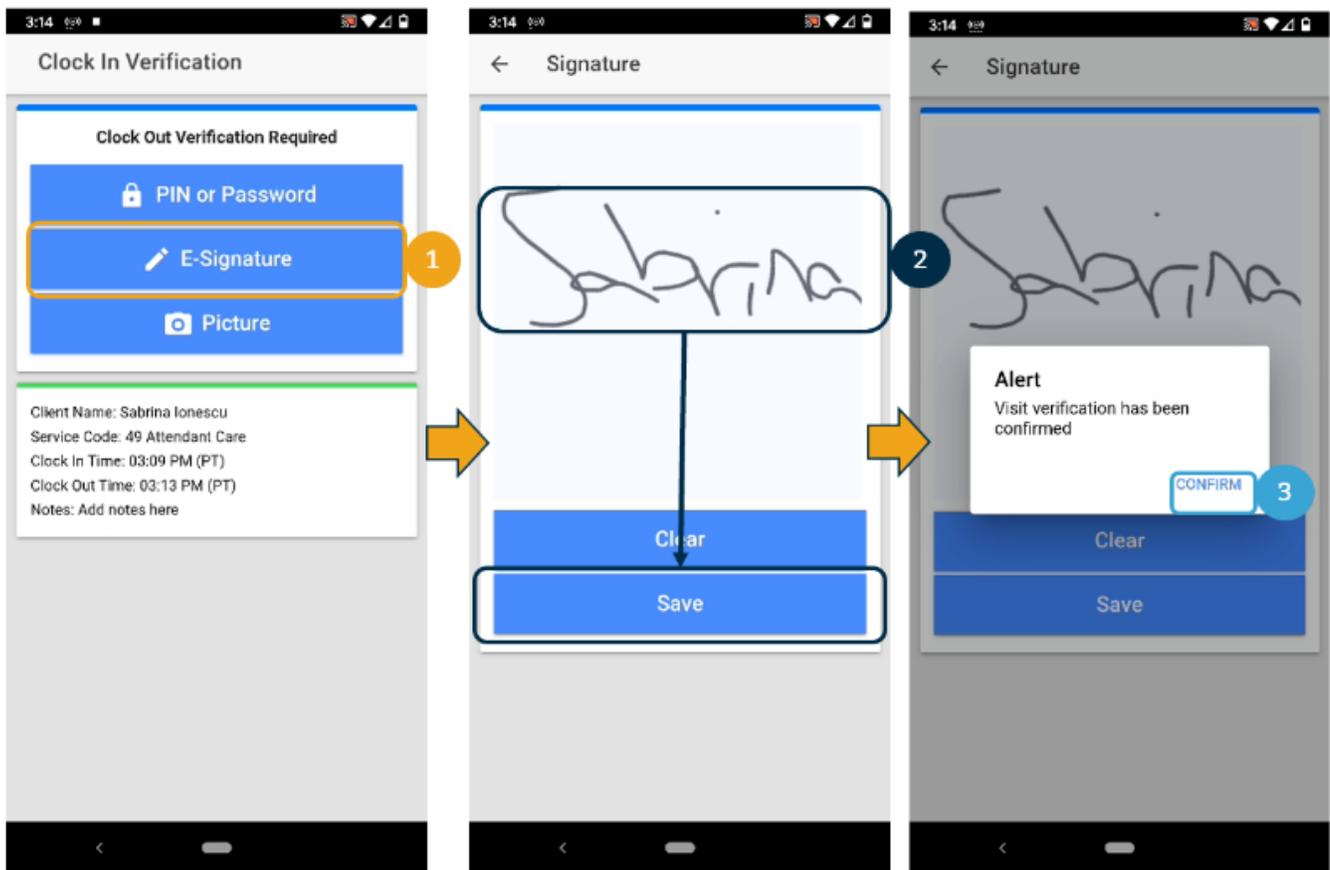

**Description:** In this topic, the user will learn how to sign electronically with E-Signature EVV/client attestation. If the client's employee is using the DCI mobile App to record punches and the client is using E-Signature as an EVV/client attestation method, follow the steps below.

**Role Required:** Client

**Permission Required:** N/A

## E-Signature EVV

1. The employee will click the **E-Signature** button and hand the device to the client
2. The client uses their finger, stylus, or adaptive device to draw their signature on the screen.
  - a. If the signature looks good, click **Save**.
    - i. If the save button is selected without a signature entered into the device, an alert will appear, and the employee will not be able to proceed.
  - b. To write the signature again, click **Clear**.
    - i. Repeat as many times as necessary
3. After the signature is saved, the employee will click **Confirm** in the alert window to validate it.
